Education

2005 - B.S. Degree in Art/Graphic Design

Oregon State University, Corvallis, Oregon

Experience

02/2016-Current: Author & Freelance Web UI Designer

Pluralsight Author - E-learning & Technology Courses, pluralsight.com

Self-Employed Freelance Web UI Designer

09/2010-05/2017: Senior Web & UI Designer

Vortx/AspDotNetStorefront - E-commerce Software - Ashland, Oregon
I am a hybrid designer that can take a project from a sketch to fully-operational e-commerce experience. I optimized the design process by cleaning up existing templates and approaching them more like 'ecosystems' rather than static Photoshop files, or a page-by-page design process. Designed and implemented custom admin user interfaces for AspDotNetStorefront. Learned all about .NET web applications built with MVC and Web Forms, and working on projects with software development teams (TFS, SVN & some GitHub)

08/2009-09/2010: Senior Web, Print & UI Designer

Superb Internet -Web Hosting - Honolulu, Seattle & Vancouver BC
While at Superb Internet, I designed for web, print, and user-interfaces. Superb is one of the oldest hosting providers in the world, and was in need of an update to various print materials, web promotions and their internal 'MyCP' control panel for customers. I worked with the development, sales and marketing teams on various user interface, web and print projects to bring consistency to brand materials and implement archival file structure for all creative assets.

02/2008 - 08/2009: Graphic Designer / Web Designer

Blue Genie Interactive LLC. - Web Design Company - Ashland, Oregon
Blue Genie is a small web company based out of Ashland, Oregon. During my time there, I sharpened my web design implementation skills. Learning not only about the bones of the web and what it takes to implement a healthy site, but also the importance of SEO/SEM, e-commerce, cross-browser and accessibility challenges.

Awards & Things

May 21, 2010 - Grand Prize Winner

Slide Deck 'Skin it to Win It' Contest.
